OVERVIEW

Where we began
ResourceCo started in 1993 with a belief that we needed to be smarter about how we use the earth’s limited resources and how we can no longer just discard materials because they had been used before.

We felt that rather than following traditional disposal methods for waste materials, we needed to recycle, re-use and re-manufacture into higher value end products.

We did not accept that the price of economic growth was environmental damage or that we had limitless supplies of energy and raw materials.

We had to become smarter about using what we have and looking for viable alternatives.

Where we are now
Today ResourceCo is widely regarded as one of Australia’s leading environmental services company and an international leader in resource recovery and advanced manufacturing.

Currently we have over 400 staff, operating in 21 locations, in all Australian States and South East Asia. We’ve established a series of partnerships that have seen us expand into a range of new areas and initiatives.

Through constant investment in research and development we continue to develop new and innovative technology that can more efficiently transform recovered materials into useable products.

Our ultimate goal is to achieve a zero waste solution. We don’t see recycling as merely a business, but essential for the sustainability of our planet, our economy and our future.

ResourceCo recycles in excess of 95% of all incoming materials while processing over 2 million tonnes of materials annually.

THE ISSUE

- Around 40% of all of the world’s waste is from construction and demolition activities. ¹
- Cement is the most widely used building material in the world, with nearly 450 kilograms of cement being consumed yearly per capita. Making cement is an energy and resource-intensive process, with both local and global impacts. ²
- Poorly managed waste has a significant impact on our health, local and global environment and the economy. ³

GROUP STRUCTURE

Our commitment to our beliefs has seen us expand, acquire and develop new businesses, create partnerships and venture into new markets we never imagined in 1993.

We have developed successful long term partnerships with multinational groups such as SUEZ of France (via SUEZ Australia), global cement leader Lafarge and in Australia with Adelaide Brighton Cement.

RESOURCECO – A SNAPSHOT

- 700+ Staff
- 21 Locations
- Operating in 5 States and 3 Countries
- We deliver over 250,000 tonnes of Processed Engineered Fuel into the Asian regions annually
- Locally 2 million tonnes of material processed annually
WHAT WE DO

What started as a mobile crushing business for concrete and construction materials, ResourceCo has quickly grown into a diverse business offering a wide range of services designed to reduce, recycle and reuse a broad range of materials and outputs.

We pride ourselves on being flexible and adaptable, offering our clients solutions, whatever challenges they face.

No challenge is too great or too small.
SOLUTIONS

- Alternative Fuels
- Transport and Logistics Solutions
- Construction and Demolition Materials Recycling
- Asphalt Recycling
- Concrete Recycling
- Bulk and Engineered Fill Supply
- Fixed and Mobile Pre-mixed Concrete Batching
- Commercial and Industrial Materials Recycling
- End of Life Landfill
- Carbon Abatement Sales and Auditing
- Aggregate, Screenings and Asphalt Based Product Supply
- Disposal, Treatment and Management of Waste Soils
- Mine and Quarry Rehabilitation
- Management of Project Specific Waste
- Renewable Energy
- Tyre and Conveyor Belt Recycling
OUR MARKETS GLOBALLY

Construction
We provide a wide range of recycled products, including pavement and asphalt type materials, aggregates, concrete and sand, and services to major civil engineering projects and both residential and commercial construction. No project is too big or too small such as:
▶ major, arterial and minor road construction
▶ retail centres
▶ warehouse and showroom construction
▶ housing developments and apartment construction

Defence
We have provided materials in the development of major Defence facilities, ranging from:
▶ infrastructure construction
▶ residential housing

Demolition
The cornerstone of the business is the processing of Construction and Demolition (C&D) waste materials, consisting of asphalt, concrete, bricks and rubble to manufacture a range of recycled aggregates and recycled asphalt products. Recycling C&D material provides a diversion of waste from landfills including:
▶ the reuse of steel from concrete
▶ conservation of resources through extending the life of quarries
▶ full lifecycle of material/s from demolition through to re-supply to site for construction
▶ carbon benefits

Major Infrastructure Projects
ResourceCo has a history of servicing major infrastructure developments as a major project partner. We work closely with our clients to create tailored environmental solutions specific to the project. Examples include:
▶ major hospitals
▶ medical research centres
▶ sports stadiums
▶ aquatic centres

Mining
The flexibility and adaptability of the ResourceCo Group is central to providing turnkey project solutions for the mining industry. Such solutions include:
▶ mobile concrete batching
▶ waste management
▶ site rehabilitation
▶ recycling conveyor belts and tyres

Transport
The ResourceCo Group has the capacity to supply recycled materials to your project or to collect your unwanted materials for recycling. Transporting these products in a timely and effective manner is important to us whether it is in:
▶ truck and trailer
▶ semi
▶ walk in floor
Energy
The ResourceCo Group believes alternative sources of energy to fossil fuels are integral to maintaining a sustainable environment. Our aim is to construct additional alternative fuel plants and purpose built power generation plants using renewable energy biomass and rubber based fuel sources across Asia and Australia.
- conserve natural resources
- reduce landfill
- reduce greenhouse gas emissions

Government
Working with Federal, State and Local Governments, the ResourceCo Group offers clients sustainable solutions to support environmental improvement targets on major projects and other capital works. To lead environmental policy development, it is critical that Government is strategically aligned with progressive, market-leading organisations. Government project examples include:
- road construction
- schools and emergency services
- rail infrastructure

Industrial & Manufacturing
We work closely with clients to audit their waste streams to recapture embodied energy in materials as part of a zero waste solution. Assisting them with the development of comprehensive environmental management plans offers our clients a competitive edge. We have provided services to this sector for projects as diverse as:
- fuel supplies
- smelters
- precast and steel manufacture

Waste
We have the capability to handle almost all waste streams from varied sources. Based on the philosophy of reduce, reuse and recycle, the ResourceCo Group offers clients a variety of recycling solutions as well as end of life options. We can deliver treatment and management of even the most obscure materials as required by our clients' targets including:
- asbestos
- organic
- soil
- metal
- C&D
- tyres
- C&I

Water
Understanding that water is another precious natural resource, ResourceCo has worked collaboratively in the development of projects such as:
- port expansion and reclamation works
- desalination projects
- development of sustainable wetlands for waste water treatment
THE FUTURE

In 1993 we never imagined that our business would be as large and diverse as it is today. No doubt, in 10 years time we will look back and realise that the journey had only just begun.

The demand to reduce, recycle and reuse materials will inevitably grow as we find new ways to solve environmental problems, improve the quality and extraction of waste materials, make better use of what we have and continue to reshape commercial and community attitudes to the disposal of waste.

ResourceCo has the vision, experience and resources to capitalise on these opportunities and, ultimately, to leave the world in a better place than we found it.
Our Beliefs

We believe we need to be a lot smarter about how we use the earth’s limited resources. We believe we can no longer just discard things because we have used them before. We need to find new ways to recycle and reuse everything. We can no longer bury, hide or dispose of waste materials that are polluted or toxic. We need to clean them up and use them again. We can no longer accept that the price of growth is environmental damage. We need to find ways to minimise the impact of our activities. We can no longer accept that we have limitless supplies of energy. We have to be smarter about using what we have and looking for viable alternatives. We believe that we have an obligation to leave the planet in a better state than we found it. We will not rest until we do. We are ResourceCo.
