

# BARANGAROO RESOURCECO MATERIAL SOLUTIONS

LOCATION	Crown Project Barangaroo
CLIENT	Ward Civil
CONTRACT	Cartage Only
DURATION	12 months

ResourceCo Material Solutions has developed a close working relationship with Ward Civil on the Crown Project at Barangaroo. This project involves complicated logistics as they work with a top down construction plan which is rarely used.

This project also uses containment sheds to ensure the asbestos contaminated soils on the project are handled safely with no adverse effects to the public. Ward Civil were looking for a company capable of handling these significant logistical and safety challenges, a task that ResourceCo Material Solutions handled in their stride.

ResourceCo Material Solutions provided a site manager to oversee the start of the project to trouble shoot any issues and adjust as required to ensure there was no delay to our customer. Using up to 30 of our state of the art PBS Quad Axle configuration accredited trucks we were able to meet all required safety standards while maximizing productivity and providing real time access to chain of custody on material movement with our GPS monitoring.
